DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 54,59-61,69-72 and 75-79 are rejected under 35 U.S.C. 103(a) as being unpatentable over Favalora et al (USPN 5,480,203) in view of Kellems (USPN 2,766,501). Favalora discloses an interwoven mesh tubular sleeve of variable length (12) with attachment means (24). The attachment means includes a doubling over of the sleeve. See 3:35-45 and 4:49-60. See figures 1-3 and 6-7. Favalora does not teach a second aperture through which the tube can pass at a second end of the sleeve.

However, Kellems teaches such a grip. See figure 4 and 3:72+. This type of grip is advantageous for removing cables from a conduit or for pulling up slack near the end of a cable.

At the time of the invention, it would have been obvious to incorporate the braiding the double open ended construction of Kellems into the invention of Favalora in order to take enhance the functioning of the device of Favalora.

Allowable Subject Matter

Claims 17,32 and 33 are allowed.

Art Unit: 3763

Claims 73-74 and 80 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments filed 3/3/06 have been fully considered but they are not persuasive. Applicant argues that Favalora does not teach a medical or surgical fastener. However, the devices above are capable of being used for securing cables on medical or surgical devices and are therefore, capable of being a medical or surgical fastener.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

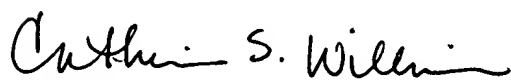

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
